

# TOP QUALITY AT LOW PRICES

ELVEM

Model EL3 is composed by a marking head with carbide pin, working on a 110x80 mm marking window and a programmable controller with included screen and input panel. Base and column with height indicator. The movement of the marking pin is controlled by electronics and driven pneumatically. The system is able to work at high speed rates. Marking depth is controlled by compressed air. Up to 10 programs can be stored inside the controller. Every program is made up by a maximum of 8 text lines. Marks the full English alphabet, numbers and special signs. Capability of managing serial numbers, date and time function and the VIN code (vehicle identification number).

## EL3

*Bench model with marking window 110x80 mm and programmable controller.*

*Model EL4 offers same characteristics as model EL3, without base and column, with marking head as a portable unit, working on a 110x15 mm marking window. Due to marking head compact dimensions, it can be easily integrated into the production line.*

## EL4

*Portable model with marking window 110x15 mm and programmable controller.*

# TOP QUALITY AT LOW PRICES

**ELVEM**

*Model EL1 is composed by a marking head with carbide pin, working on a 110 x 80 mm marking window, electronic interface box, high performance computer, Windows® based operating system, keyboard and mouse. Base and column with height indicator. The movement of the marking pin is controlled by electronics and driven pneumatically. The system is able to work at high speed rates. Marking depth is controlled by compressed air. Marking software is a friendly WYSIWYG windows based application: linear and arc text, graphic tools and logo (.wmf, .dxf vectorial formats) are standard marking shapes.*

*The system can import every TTF font and special fonts created by a font generator software included in the package.*

*Serial numbers, date and time codes, VIN, interface to PC, database, barcode and printer. As an additional implement the rotary axis enables marking round parts.*

*Bench model with marking window 110x80 mm. PC, monitor, mouse and keyboard included.*

*Portable model with marking window 110x15 mm. PC, monitor, mouse and keyboard included.*

*Model EL2 offers same characteristics as model EL1, without base and column, with marking head as a portable unit, working on a 110x15 mm marking window. Due to marking head compact dimensions, it can be easily integrated into the production line.*
